MB Swiss Medical Partners - Personalized check-up offer

Your health will be assessed through a detailed interview with an internal medicine specialist who will discuss with you previous illnesses, risk factors and listen to your areas of concern. Once the results of your tests are available, the doctor will discuss them with you and answer any questions you may have. A final summary report will be created and if any further examinations are required or advised you will receive expert advice on the issue and MB Swiss Medical Partners will make the necessary appointments for you with the specialist needed for further testing.

- | | | |

Once your check-up has been carried out and your tests results are available MB Swiss Medical Partners will create and store a medical file which can be (at your request) transferred to your general practitioner in your country of residence. Your medical file will be continuously updated after any further medical visits*.

**MB Swiss Medical Partners stores all patient medical data on a Swiss server and according to the GDPR (General Data Protection Regulation) guidelines*

A cost estimate will be provided to you by MB Swiss Medical Partners based on the selected check-up and further evaluations. A full deposit will have to be paid 5 days prior to the first appointment.

Cancellation policy

- 5 days before first appointment (no fee)
- 2 days before first appointment (50% of total amount)
- 1 day before first appointment (100% of total amount)
